

## Upload Image To IBM Container

Date	08 November 2022
Team ID	PNT2022TMID30524
Project Name	Nutrition Assistant Application

### CREATING REPOSITORY IN IBM CLOUD:

The screenshot shows a dark-themed dialog box titled "Create repository" with a close button (X) in the top right corner. It contains two numbered steps for creating a repository:

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.  

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```
2. Push the tagged image.  

```
docker push icr.io/<my_namespace>/<my_repo>
```

Each code block is followed by a copy icon.

## UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot shows the IBM Cloud Container Registry interface. The sidebar on the left contains the following navigation items:

- Container Registry
- Quick start
- Namespaces (1)
- Repositories (1)**
- Images (1)
- Trash (0)
- Settings

The main content area is titled "Repositories". It features a "Location" dropdown menu set to "Global". Below this is a search bar and a "Create" button. A table lists the repositories:

<input type="checkbox"/>	Name	Image count	Namespace	Last updated
<input checked="" type="checkbox"/>	 <b>ibmproj</b> icr.io/myproj/ibmproj	1	myproj	4 days ago

At the bottom of the table, there are pagination controls: "Items per page: 25", "1-1 of 1 item", and "1 of 1 page".
